

## SLATE FIXED BY DEMOCRATIC LEADERS

Hand-Picked Candidates Named  
for All County Offices  
in Honolulu.

LIONS AND LAMBS TOGETHER

Famine of "Would-Bes" Turns  
Out a Canard—Supervisor  
List Is Full.

Things are fixed!  
There's no further occasion for the business men of this city to rack their brains and loosen up their bank accounts to try and show how to do politics in this city. The Democrats have settled the slate, and all is over but the shouting—until the votes are counted.

There was actually some anemic bluff story going the rounds yesterday to the effect that the Democratic party leaders were having trouble filling up the various offices with proper candidates hand-picked from the Democratic ranks. Perish the bluff, which is hereby called for a show down.

In fact when it comes to pilikia, Democratically speaking, there's nothing doing, to quote the great orator of the party.

The slate which has been decided upon for the Democratic voters is as follows:

For mayor, Joseph J. Fern.  
For auditor, L. D. Timmons.  
For treasurer, Col. Charles McCarthy.

For county clerk, John Effinger.  
For county attorney, Clem Quinn.  
For sheriff, William P. Jarrett.  
For deputy sheriff, Charles H. Rose.  
For supervisors, Richard H. Trent, president of Trent Trust Company; Edmund Stiles, of the Bank of Honolulu; Richard L. Gilliland, former deputy sheriff at Waianae; Lester Petrie, master mechanic O. R. & Co.; William H. McClellan, present supervisor; M. C. Pacheco, chairman Territorial Democratic central committee, and Mr. Markham.

The great question now is will the Democratic county convention stand this slate? Just watch it.

HOUSE SEAL DIES OF OLD AGE

Has Seen Three Wars and Only Five  
Democratic Presidents in Eighty-  
Two Years.

WASHINGTON, August 17.—After eighty-two years of service, crimping the parchment of official house documents, the great seal of the house of representatives, made in the administration of Martin Van Buren, in 1830, is to be discarded for a new one which was officially authorized by resolution of the house. The house seal is being laid away because it has now become so worn as to make impressions taken from it almost illegible. It is not oslerizing, but plain, everyday old age that killed this ancient seal which has been continuously in use since 1830, and challenges other seals, great and small, in any part of the world to show a greater record of activity.

The resolution authorizing the new seal reads: "That the clerk of the house is instructed to provide a new seal for the house of representatives which shall preserve the same design and inscription as the present seal, but shall now have forty-eight stars emblematic of the forty-eight states of the Union, instead of the twenty-four stars upon the present seal, which represent the twenty-four states constituting the Union at the time of the adoption of the present seal."

The design on the old seal is a view of the old Capitol, without the dome and wings, as it appeared in 1830, surrounded by the twenty-four stars. The new design will have a star inserted between each of these twenty-four, making forty-eight in all. Andrew Stevenson of Virginia was speaker of the house when this old seal was made. Since then there have been twenty-four speakers and three wars—the Mexican, the civil, and the Spanish—through which this seal has been used. In all that time there have been five Democratic Presidents—Van Buren, Polk, Buchanan and Cleveland.

This seal is used in stamping every subpoena, as well as every other official document of the house issued by authority of that body, and its impression is so faint that the outlines of the old Capitol and even the bordering stars cannot be discerned.

Land Commissioner Tucker has gone to Hilo where he will supervise today a land drawing for homesteads. Incidentally he took over with him a number of documents relative to the sale of a strip of land to a Japanese named Hain, which it is now claimed the Territory had no right to sell. He will try to straighten out the tangle.

MAURETANIA'S TWO CAPTAINS

Canard Company Adopts New Plan  
for Safety on Big Atlantic  
Ocean Greyhounds.

NEW YORK, August 12.—In addition to Capt. W. T. Turner, her regular commander, the Mauretania, which arrived yesterday from Liverpool, has a staff captain, S. G. S. McNeil, R. D. R. N. R., who is responsible, to use his own expression, for the discipline and efficiency of the ship. Captain McNeil was in command of the Cunard liner Albanian in the London-Montreal service, and for three years previously was chief officer of the Lusitania. He wears the same uniform as Captain Turner, and has a table in the dining saloon, with quarters on a deck forward.

This departure, it was said yesterday, was decided upon by the Cunard directors to insure the safety of passengers by having boat drills and the general working of the ship under one responsible official who had no watch to keep on the bridge. The staff captain will arrange the officers' watches, order the boat drills, and enter them in the log book. He will also be responsible for the discipline and cleanliness of every department in the ship. He will also be available to relieve the captain or the watch officers on the bridge if it is necessary.

The chief officer will be retained as before, with six officers under him. His salary has been increased. The staff captain appointed to the Lusitania is Capt. J. P. Simpson, from the Cunard Mediterranean liner Veria. The liners Carmania and Caronia will not carry staff captains, but will have their staff officers increased to seven, out of which one will be the relief officer to carry out any extra duties that may occur on the voyage, and relieve the chief officer on the bridge when necessary. The staff captains for the Mauretania, Lusitania and Aquitania, when she comes out, will be selected from the captains of the smaller liners in the Cunard service.

After the Mauretania docked yesterday Captain McNeil had all the boats lowered from A deck to the water, and tomorrow morning at 9:30 o'clock there will be a race between the boats' crews for the Harwick Silver Challenge Cup, given by Colonel Harwick, and put in the care of Chief Steward Fred Jones. The staff captain will be the starter, and Dr. B. Sidney Jones, the ship's surgeon, will be the judge.

No word has been received recently from Treasurer Chamberlain, who is in the East looking after the delivery of the bonds of the Territory which went for ward to him at the Hawaiian land sale. The bonds are to be delivered to the treasurer by Mr. Chamberlain, of which he is expected to start for home.

## STANLEY LASHES GEORGE W. PERKINS

Declares He "Picked Pocket of  
a Shroud," With Colonel  
Looking On.

WASHINGTON, August 14.—The personal and political relations of Col. Theodore Roosevelt and George W. Perkins, formerly of J. P. Morgan & Co., were bitterly attacked on the floor of the house today by Representative A. O. Stanley, of Kentucky, who is chairman of the Steel Trust investigation committee. In supporting his bill to make the reports of the commissioner of corporations available for congress, Representative Stanley charged that Roosevelt had protected the harvester trust from government prosecution, and described Perkins as the "go-between" of "big business" and the government. Representative Stanley's characterizations of the former Morgan associate were extremely bitter. He dwelt at length on the absorption of the Tennessee Coal & Iron Company by the United States Steel Corporation, and charged that Perkins had been able to secure from Herbert Knox Smith, former commissioner of corporations, information which was denied congress. The new Progressive party also came in for an extended discussion.

"I hear that this new party of progressive capitalism," he said, "will sing hymns between the tirades of Roosevelt and the platitudes of Perkins, and that Perkins is to be the choir leader. I would suggest that they paraphrase the war cry of the Turkish Janizaries and adopt it as the battle hymn of the faithful from Wall Street: 'Allah! Allah! Mammon is Allah! There is no God but Mammon and Morgan is his prophet!'"

In his attack on Morgan, Stanley said: "For several years the chief intermediary between big business and those who are invested by the executive department with the duty of investigating it has been a gentleman by the name of George W. Perkins."

"For years, this fanatically ardent partisan has broken through all restraints that deter better men and has unhesitatingly sacrificed any other obligations to society and himself in the secret service of his party."

"In 1904 Mr. Perkins, in his eagerness to aid his party and his hero, Mr. Roosevelt, actually gave \$50,000 of other people's money to his cause. He gave his personal check to Mr. Bliss and was reimbursed by check of the New York Life Insurance Company—number 7283—payable to J. P. Morgan & Co. The proceeds of this check were traced to Mr. Perkins and for this eminent service he was arrested under a warrant charging him with grand larceny."

"Perkins knew the consent of the policyholders was necessary to save this appropriator of their funds from the guilt of common larceny and that consent was not and could not have been obtained."

"Who were these pilfered policyholders? The most pathetic and helpless figures in all this vale of tears. The young mother wrapped in the black habit of woe, prostrate upon the new-made grave of her once loving lord, orphans waiting the name of father above the silent dead. He robbed the widow of her slender patrimony and snatched the last crumb from the pinched fingers of helpless childhood. In all the loathsome annals of greed and graft, there is nothing so sordid and pitiless as the creatures who did it."

"This man escaped a prison cell by the skin of his teeth for having picked the pockets of a shroud for the use and benefit of the Republican party."

Representative Stanley declared that later Perkins came to Washington as "envoy extraordinary and minister plenipotentiary from J. P. Morgan & Co., the harvester and steel trusts."

INVENTS WIRELESS  
TO CARRY PICTURES

LONDON, August 12.—Wireless messages will be sent across the Atlantic and to other parts of the world by a new system, according to experts, within four months. The new system will not only be much faster than the present one but will have such precision that it will be possible to send pictures.

The new system has been taken up by one of the big European telegraph companies and will be given a thorough test. The inventor asserts he will be able to send at the rate of two hundred words a minute. The improvement consists in being able to control a continuous wave in comparison with intermittent waves of the present system.

After the Franco-American line is working the company intends to extend the system to the East, to Africa and to the British colonies.
